

# STILL LIFE DRAWING

**A still life drawing is when an artist collects natural/everyday objects and arranges them together to draw.**

- Collect 3 or 4 things from around your house and arrange them on a table/surface.
- If you have a patterned cloth/material to go underneath it would be good.
- Try to sketch the objects from your perspective.
- Check online for some ideas.
- Examples of objects; bottles, plants, jugs, fruit, flowers, cups etc.

If you have paint/wax crayons you could try the wax wash technique shown above on the right picture.
